AUTOMATIC COLLEGE BELL WITH VOICE ANNOUNCEMENT SYSTEM.

MODEL: PC SOFTWARE.

Our Voice bell-is a software tool which activates Audio output for the specified time. It completely eliminates gong bell and siren system which produces repeated maintenance cost. This unit simply uses the audio amplifier system(speaker system) which will be commonly available in institutions and other areas for announcements. User can able to record announcements with their own voice / pre-recorded audio files and save it into our system. User can append the announcement file and play automatically for the specified date and time.

✎ If you have already installed amplifier and speakers in your institution, you can use this model.

✎ Sound reachability depends upon your P.A system

✎ All you have to do is just plug the power supply of your amplifier to the hardware unit and connect the audio out of computer (installed CATEK VOICE BELL SOFTWARE)to your amplifier's AUX IN.

BENEFITES:

- No human activity required once installed.
- Bell rings at sharp time.
- Voice announcement helps us to understand what is going on rather than just a bell
- No staff required for bell ringing.
- Save human effort and money.
- Special alerts facility for emergency alarm in case of fire,bomb and earthquake.
- Can also be used as a usual public addressing system.

Features:

- Configurable for most windows operating system any PC from your office.
- No limitations for Alarms and Announcements.
- Supports major audio file formats.
- User Authenticated Security.
- Cost Effective and Easy Installation.
- Pre - configurable alarm alert bell sounds.
- For each alert user can attach an announcement file.
- Built-in feature for recording your own voice announcements.

Application areas: Schools, Colleges, Industries, Offices, Banks, etc.
